Learn more about what an RN to BSN can do for you.

The new RN to BSN program can be completed online with the exception of two 45-hour practice learning experiences. The program offers flexible, 30-credit hour, eight-week block degree plans so that you can finish in one year as a full-time student or two years as a part-time student. You’ll be able to advance your nursing career while still working and having time to spend with your family.

UHV’s RN to BSN curriculum builds upon the ADN’s competencies. It will develop your skills in accessing and using evidence in clinical decision-making so that you are ready to assume leadership roles in collaborative practice. You also will learn about the impact of health care systems as well as the application and impact of informatics and technology on health care for families and communities on health outcomes.

Computer requirements and skills

• Access to computer, webcam and high-speed Internet
• Ability to navigate the Internet, and skills in keyboarding, word processing and Microsoft Office
Advance your career with an online RN to BSN
